Letter of Recommendation for Andrés Navarro Pedregal

Dear Search Committee,
Technical Studentship - IT, Mathematics & Robotics 2024-3,
CERN, Geneva, Switzerland

I enthusiastically recommend Andrés Navarro Pedregal for the Technical Studentship - IT, Mathematics & Robotics at CERN. Andrés was a student in my undergraduate course of "Mathematics Extension". He performed distinctly well and stood within the top 6% of the class. He has a high aptitude for mathematics and was very involved in his work, applying himself with persistence, sometimes going beyond the regular class assignments.

He is a very dedicated student, and I was impressed with his motivation and hard-work towards his academic goals. During my course, he fully demonstrated his willingness and ability to handle both fundamental concepts and convoluted analysis rather comfortably. He always showed a desire to learn and to succeed, regardless of how trivial the task may appear. From his first midterm on "Complex Analysis" he proved to be a student with an exceptional thought process and above-average presentation skills. I found the resolution of the exam to be impeccable, with concise answers, clear developments, and clean writing. It is the perfect example of how to do an exam. Additionally, he achieved the highest grade in the entire class, further emphasizing his outstanding performance. There is little doubt that Andrés' unparalleled determination makes him a prime candidate to become an outstanding student in his chosen field of study.

Andrés' personal qualities are as outstanding as his academic accomplishments. He is a very empathetic individual, always trying to support and push the people around him to do their best and enhance their own abilities.

He has a strong interest in learning and exploring new concepts, never afraid of pushing himself to encounter different situations. This ability was what helped him to make the most out of his studies at Universidad Carlos III de Madrid, proving him to be an independent and curious individual. I believe these qualities will traverse well into the research world.

I found him very pleasant, responsible, and easy to get along with. Moreover, he is honest, never stooping to cheat. It is my firm belief that Andrés Navarro Pedregal will make an outstanding student and he has my highest recommendation.

If you need any further information about him, please do not hesitate to contact me.

Sincerely,

Prof. Dr. Jorge Arvesú,
Department of Mathematics,
Universidad Carlos III de Madrid.
