**Re: Recommendation letter for Mr. Andrés Navarro Pedregal**

To whom it may Concern:

It is my pleasure to recommend Andrés Navarro Pedregal for admission to the “Technical Studentship - IT, Mathematics & Robotics 2024/3” program of CERN. I met Andrés last year when I was his instructor in the theory classes of the course “Systems Architecture” (Dual Bachelor in Data Science and Engineering and Telecommunication Technologies Engineering) where I taught him the basics of C programming, use of dynamic memory and data structures in C, use of processes and communication between processes, and synchronization mechanisms in Java. As my student, Andrés showed extraordinary programming skills, interest and commitment, as he attended and participated actively in all my sessions and achieved the highest possible grade (honors).

I would like to specially highlight his level of achievement, as he stood out in the class and showed an excellent level in a course where most student struggle with. I particularly appreciated that in the conversations I had with him throughout the course. Therefore, I have no doubt that he will be fully engaged in the program if he is admitted, and he will make the most in the program, so I recommend his admission without reservations, and I believe he can be a good asset in the program.
