Letter of Recommendation Mr. Andrés Navarro Pedregal

July 4th, 2024

To Whom It May Concern:

It gives me great pleasure to write this letter of recommendation for **Mr. Andrés Navarro Predegal**. I have been his teacher in one of the subjects of his Bachelor Studies at Carlos III University of Madrid. In particular, I have been his teacher in the course of *Electronic Components and Circuits*, a course that is mainly focused on the fundamentals of analog electronics, from discrete components to larger devices, e.g. amplifiers, integrated circuits etc. In this bachelor, Andrés has been acquiring a solid knowledge in electronics with applicability in a large number of applications .

I would like to remark his participation and clear motivation about the contents of the course. The concepts and applications that we have discussed during the course have definitely expanded his background and he has shown always an interest on them.

For this reason, I think that **Andrés Navarro Pedregal** is a good candidate for the **Technical Studentship - IT, Mathematics & Robotics 2024** as a first step to develop his professional career, from both a scientific and innovative point of view. I am sure that he will take an excellent advantage of this opportunity and it may be a good complement for his academic formation.

Yours faithfully,

Fdo. Braulio García-Cámara
